PROVINCE OF ONTARIO

VITAL STATISTICS

4301-

for

1963 -67

Printed Under the Authority of

THE HONOURABLE JOHN YAREMKO, B.A., Q.C. REGISTRAR GENERAL

THE HONOURABLE JOHN YAREMKO, B.A., Q.C. REGISTRAR GENERAL

Foreword

I take pleasure in presenting the 94th Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

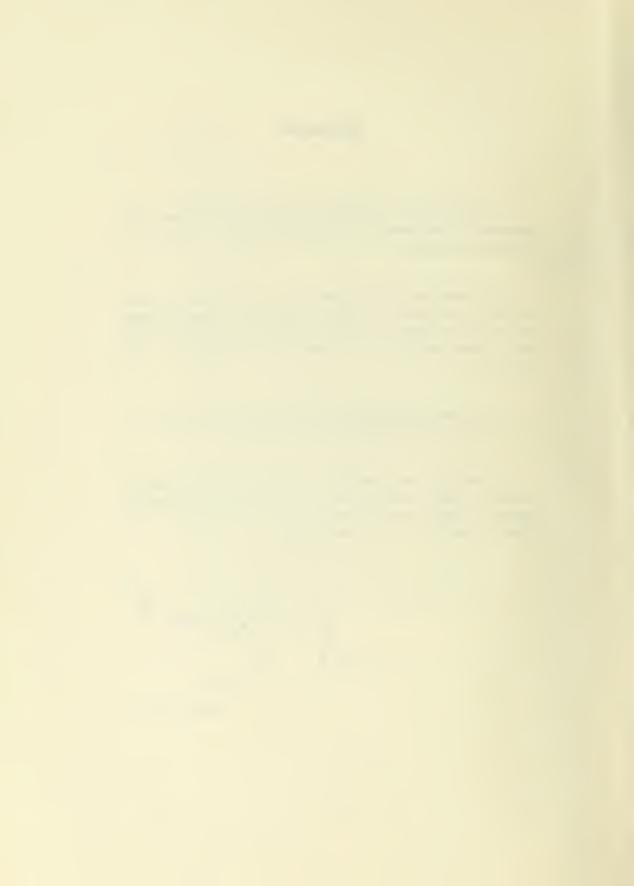

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1963.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

B.A., Q.C.,

Mareul.

Registrar General

SIR:

I have the honour to submit for your approval the Ninety-fourth Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1963.

I have the honour to be, Sir,

Your obedient servant,

Deputy Registrar-General.

To the Hon. John Yaremko, B.A., Q.C. Registrar General of Ontario.

[†]Rates not computed for less than 5 stillbirths.

^{*}As of January 1962, stillbirths of 20 weeks' gestation or more were registered.

Infant Mortality

Shown in Table I are the numbers of infant deaths by age at death over the ten-year period 1954 to 1963. The steadily decreasing neonatal and infant death rate and the stillbirth rate are shown in Chart 3.

Cities—Units of 10,000 population and over. Towns—Units of 5,000 to 10,000.

General Mortality

The trend in general mortality over the period 1939 to 1963 is shown in Table M. Tables N to P illustrate the general mortality by age and/or cause. Special detailed tables for specific causes are shown in Tables Q to T. Special cross classification of accidental and violent deaths is shown in Table U.
